PSYCHOMETRIKA—VOL. 1, NO. 4
DECEMBER, 1936

INDEX FOR VOLUME 1.

AUTHORS

Brown, J. F., "On the Use of Mathematics in Psychological Theory," March 1936, 77-90; June 1936, 7-15.

Dunlap, Jack W., "Note on Computation of Bi-serial Correlations in Item Evaluation," June 1936, 51-58.

Dunlap, Jack W., "Nomograph for Computing Bi-serial Correlations," June 1936, 59-60.

Eckart, Carl (with Gale Young), "The Approximation of One Matrix by Another of Lower Rank," September 1936, 211-218.

Edgerton, Harold A. (with Laverne E. Kolbe), "The Method of Minimum Variation for the Combination of Criteria," September 1936, 183-187.

Engelhart, Max D., "The Technique of Path Coefficients," December 1936, 287-293.

Griffin, Harold D., "A Further Simplification of the Multiple and Partial Correlation Process," September 1936, 219-228.

Guilford, J. P., "The Determination of Item Difficulty When Chance Success is a Factor," December 1936, 259-264.

Gulliksen, Harold, "The Relationship between Degree of Original Learning and Degree of Transfer," March 1936, 37-43.

Gulliksen, Harold, "The Content Reliability of a Test," September 1936, 189-194.

Horst, Paul, "Obtaining a Composite Measure from a Number of Different Measures of the Same Attribute," March 1936, 53-60.

Horst, Paul, "Item Selection by means of a Maximizing Function," December 1936, 229-244.

Hotelling, Harold, "Simplified Calculation of Principal Components," March 1936, 27-35.

Kolbe, Laverne E. (with Harold A. Edgerton), "The Method of Minimum Variation for the Combination of Criteria," September 1936, 183-187.

Kurtz, Albert K., "The Use of the Doolittle Method in Obtaining Multiple Correlation Coefficients," March 1936, 45-51.

Ledermann, Walter, "Some Mathematical Remarks Concerning Boundary Conditions in the Factorial Analysis of Ability," September 1936, 165-174.

Lev, Joseph, "A Note on Factor Analysis by the Method of Principal Axes," December 1936, 283-286.

AUTHORS (2)

Mosier, Charles I., "A Note on Item Analysis and the Criterion of Internal Consistency," December 1936, 275-282.

Rashevsky, N., "Mathematical Biophysics and Psychology," March 1936, 1-26.

Rashevsky, N., "Further Contributions to the Mathematical Theory of Human Relations," June 1936, 21-31.

Rashevsky, N., "Mathematical Biophysics of Delayed Reflexes in Connection with the Theory of Error Elimination," December 1936, 265-273.

Richardson, M. W., "Notes on the Rationale of Item Analysis," March 1936, 69-76.

Richardson, M. W., "The Relation between the Difficulty and the Differential Validity of a Test," June 1936, 33-49.

Roff, Merrill, "Some Properties of the Communality in Multiple Factor Theory," June 1936, 1-6.

Stephenson, William, "The Foundations of Psychometry: Four Factor Systems," September 1936, 195-209.

Stouffer, Samuel S., "Reliability Coefficients in a Correlation Matrix," June 1936, 17-20.

Thomson, Godfrey H., "Boundary Conditions in the Common-Factor Space, in the Factorial Analysis of Ability," September 1936, 155-163.

Thurstone, L. L., "The Bounding Hyperplanes of a Configuration of Traits," March 1936, 61-68.

Thurstone, L. L., "The Factorial Isolation of Primary Abilities," September 1936, 175-182.

Wilson, Lawrence A. (with Herbert Woodrow), "A Simple Procedure for Approximate Factor Analysis," December 1936, 245-258.

Woodrow, Herbert (with Lawrence A. Wilson), "A Simple Procedure for Approximate Factor Analysis," December 1936, 245-258.

Woodrow, Herbert, *Psychometric Methods*. By J. P. Guilford — a Review. December 1936, 295-296.

Young, Gale (with Carl Eckart). "The Approximation of One Matrix by Another of Lower Rank," September 1936, 211-218.

TOPICS

Biophysics, mathematical: Mar. 1-26; June 21-31; 265-273.

Centroid Method: Mar. 71; 275-282; 245, 246, 248, 256.

Computational Methods: Mar. 45-51; June 51-58, 59-60; 219-228; 245-258; 263-264.

Constant Method: June 37-46.

Correlation: Mar. 69-76; June 36, 37, 46, 51-58, 59-60.

Difficulty: Mar. 69-76; June 33-49; 259-264.

Factor Theory: Mar. 27-35, 61-68; June 1-6; 155-163; 165-174; 175-182; 195-209; 211; 275-282; 283-286; 291-292.

Item Analysis; Mar. 69-76; June 51-58, 59-60; 229-244; 259-264; 275-282.

Learning: Mar. 1-26, 37-43.

Matrix Theory: Mar. 27-35; 165-174; 211-218.

Methods of Combining Variables: Mar. 45-51, 53-60; 183-187; 219-228.

Multiple Correlation: Mar. 45-51; June 20; 219-228; 290-292.

New Statistical Techniques: Mar. 53-60; June 17-20; 183-187; 229-244.

Part Correlation: 291-292.

Partial Correlation: June 20; 219-228; 291-292.

Path Coefficients: 287-293.

Reliability: Mar. 71-73; June 17-20; 189-194.

Semi-partial Correlation: 291-292.

Tetrad-differences: 250, 255, 256, 257.

Topology: Mar. 77-90; June 7-15.

Validity: June 33, 49.
